

第307回 東京歯科大学学会・総会  
東京歯科大学 私立大学研究ブランディング事業  
顎骨疾患の集学的研究拠点形成

Multidisciplinary Research Center for Jaw Disease (MRCJD)

2019 International Symposium

Molecular Science in Bone Biology and Periodontology

シンポジウム参加費：無料

2019.10.19 (土) 13:00~17:35

会場：東京歯科大学水道橋校舎  
新館 8 階

Speakers

Session 1: 13:05 – 14:50 (moderator: Ichiro Nishimura, UCLA)

**Bjorn Reino Olsen (Harvard School of Dental Medicine)**

Disorders with excessive loss of jaw bones : lessons from genetic and clinical studies

**Toshihisa Komori (Nagasaki University)**

What is a real function of osteocalcin?

**Toshifumi Azuma (Tokyo Dental College)**

Runx2 governs nuclear function and chromatin dynamics:  
New Runx2 Paradigm

Session 2: 15:00 – 17:30 (moderators: Akira Yamaguchi, Atsushi Saito)

**Hiroshi Takayanagi (The University of Tokyo)**

Periodontitis, arthritis and osteoimmunology

**George Hajishengallis (University of Pennsylvania)**

DEL-1: Integrating anti-inflammatory and pro-resolution signals

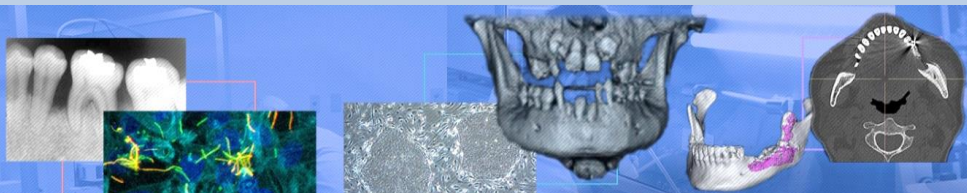

**Kazuyuki Ishihara (Tokyo Dental College)**

Strategy for colonization by periodontal pathogen *Treponema denticola* in periodontitis

**Shinya Murakami (Osaka University)**

The future of cytokine and stem cell therapies for periodontal regeneration
